

**SAFETY ROPES**

# SAFETY ROPES

Cotesi is one of the worldwide leading companies in the production and distribution of ropes and nets. Our products are used for fishing, mooring, towing, lifting, offroad recovery and several industrial applications. In our production we use various synthetic fibers.

With a vast experience of over 50 years, we keep our focus in the future continuously providing new solutions for the increasing demand of our customers.

Our global presence has been allowing us to build a network of solid relationships with customers around the world. The deep knowledge of the industry's needs and a strong notion of service turn Cotesi into a partner rather than a supplier. Cotesi is an ISO9001 certified company giving you a full warranty of the highest standards of quality.

Designed and certified to comply with the requirements CE EN 1891, Cotesi Static Ropes are a key product for usage in vertical work. Manufactured using the best fibers, Cotesi static ropes are designed for professionals and provide maximum performance and safety, suitable to a wide range of industries.

Whether arborist work up a tree, or scaling a wind farm as an offshore contractor, our range provides a solution for all working at height operations, covering various activities: difficult access, technical rescue, industry.

# TECHNICAL INFORMATION

**Construction:** multiple colors/32 plait

**Material:** Nylon (core and cover)

DIAMETER mm	WEIGHT (Kg/100)	BREAKING STRENGTH (Kgf)	ELONGATION	LENGTHS METER
10.5	7.1	3400	2,98	50, 100 and 200
11	7.8	3700	3,52	50, 100 and 200
12	9.6	4500	3,17	50, 100 and 200

- EN 1891 Conformity
- Good compatibility with Hardware
- Easy to knot and flexible
- Maximum Security
- Good abrasion resistance
- High energy absorption
- High strength
